Subject Index

A

Acipenser sturio. *See* European Atlantic sturgeon
Adélie penguin, alleles in 566–571
Affymetrix canine chip 817–828
AFLP. *See* Amplified fragment length polymorphism
Afrotheria genome 485–493
Aggressive behavior, in dogs 786–796
AIS. *See* Alleles In Space (AIS) computer program
albino locus 289–301
Alleles In Space (AIS) computer program 718–721
α-amylase (AMY) 388–395
Alport syndrome 739–744
Amaranthus, weedy 410–416
American cocker spaniel, *Sry*-negative XX sex reversal in 452–454
Amplified fragment length polymorphism (AFLP)
  Coffea 59–65
  Mentha hybrids 542–549
  weedy *Amaranthus* 410–416
AMY. *See* α-amylase
Amylase system, in *Drosophila melanogaster* 388–395
Anacamptis palustris. *See* Orchid
Ancient moa species, DNA barcoding of 279–284
Andean oak, mating patterns of 635–643
Angiosperms, evolution of 225–240
Antirrhinum, B-function in 225–240
Apamea crenata moth, melanism in 522–528
Apis mellifera L. *See* Honeybee
Arabidopsis
  B-function in 225–240
  phytochrome in 197–204
Architeuthis. *See* Giant squid
Array-based transcript profiling 817–820
Artemia franciscana. *See* Brine shrimp
Articular cartilage, in dog 821–828
Astyanax mexicanus. *See* Mexican blind cavefish
Asymmetry 471
Atlantic salmon, rearing environment and reproductive tactic in 261–278
Atlas computer program 623–625
Autism 471–472
Autotetraploids, gametophytic self-incompatibility in 430–433

B

Baiji, major histocompatibility complex of 310–317
Bali Kintamani dog 854–859
Barcoding, DNA 279–284
Barley, semidwarfism in 654–662
Basque-Navarrese native horse breeds, genetic diversity in 670–678
Bedlington terriers, copper toxicosis in 803–811
Bell, Alexander Graham 1–3
B-function, in *Arabidopsis* and *Antirrhinum* 225–240
Biston betularia. *See* Peppered moth
Brain, evolution of 179–180
Brine shrimp, maternal effects on encystment in 713–717
brown locus 289–301
Busycon carica. *See* Knobbed whelk

C

Canine *COL4A3/A4* 739–744
Canine DNA 452–454, 735–738, 745–754, 786–802, 817–820, 829–835, 843–846
Canine ectodermal dysplasia 727–734
Canine GeneChip 821–828
Canine leishmaniasis 755–758
Canine multiple system degeneration 727–734
Canine neoplasias 764–765
Carcinoma, prostate 782–785
Carson, Hampton L. 285–286
Carthamus tinctorius L. *See* Safflower
Cassava, in subhumid conditions 586–592
Cat. *See* Domestic cat
Catharanthus roseus (L.) *See* Periwinkle
Cavalier King Charles Spaniel (CKCS), inherted occipital hypoplasia/syringomyelia in 745–749
CDA. *See* Color dilution alopecia
Centromeres, in mammalian genome 217–224
Ceroid lipofuscinosis 735–738
cGH. *See* Chicken growth hormone
Chiari type I malformation 745–749
Chicken, single nucleotide polymorphisms in 698–703
Chicken growth hormone (*cGH*) 698–703
Chinese Crested dogs, movement disorder of 727–734
Chinese river dolphin, as endangered species 310–317
Chlorophytum rDNA sites 155–160
Chloroplast DNA (cpDNA)
  orchid 66–70
  soybean 593–599
Chromosomes
  canine 766–776
  Chlorophytum 155–160
  cotton 132–144
  mice 329–338
  Pinscher 774–776
  rat 339–345
  scallop 52–58
  Xenopus laevis 603–606
  See also Genetic linkage mapping
CKCS. *See* Cavalier King Charles Spaniel

CDA. *See* Color dilution alopecia
Centromeres, in mammalian genome 217–224
Ceroid lipofuscinosis 735–738
cGH. *See* Chicken growth hormone
Chiari type I malformation 745–749
Chicken, single nucleotide polymorphisms in 698–703
Chicken growth hormone (*cGH*) 698–703
Chinese Crested dogs, movement disorder of 727–734
Chinese river dolphin, as endangered species 310–317
Chlorophytum rDNA sites 155–160
Chloroplast DNA (cpDNA)
  orchid 66–70
  soybean 593–599
Chromosomes
  canine 766–776
  Chlorophytum 155–160
  cotton 132–144
  mice 329–338
  Pinscher 774–776
  rat 339–345
  scallop 52–58
  Xenopus laevis 603–606
  See also Genetic linkage mapping
CKCS. *See* Cavalier King Charles Spaniel

CLN2/5/6/8 genes 735–738
Clonal organisms, genetic diversity in 434–440
Coffea amplified fragment length polymorphism 59–65
COI gene. *See* Cytochrome *c* oxidase I gene
COL4A3/A4 genes 739–744
Coloration
  domestic cat 289–301
  flower pollen 550–556
  MSKR mouse 145–149
  mustelid 607–613
  Pinscher 774–776
Color dilution alopecia (CDA), Pinscher 774–776
COMMD1 gene 803–811
Computer program
  for analysis of interindividual spatial and genetic information 722–724
  for analysis of populations using molecular coancestry information 718–721
  for designing primers using human gene structure and livestock information 80–82
  Java-based tool for managing genotypes 623–625
  pedigree analysis and visualization for breeding and science 465–468
  performing Muir's alternative partitioning of genotype-by-environment interaction 78–79
  for prediction of cis-acting regulatory elements 618–622
Copepod, hybridization between 114–123
Copper metabolism protein, canine copper toxicosis and 803–811
Cotton
  chromosomes 132–144
  leaf and stem pubescence 441–444
  leaf defoliation 644–653
cpDNA. *See* Chloroplast DNA
Cryptocercus wood-feeding cockroaches, population genetics of 572–575
Cytochrome *b* gene 688–697
Cytochrome *c* oxidase I (COI) gene 279–284
Cytogenetics, of intergeneric vine cacti 124–131

D

Dalmation dog, hyperuricosuria in 750–754
Darwin, Charles 174
Deafness 1–2
DEFICIENS gene 225–240
Diversity conservation, Weitzman approach to 704–712
DLA-DRB1 locus, canine 836–842
DMRT1 gene 759–763
DNA
  animal design 125
  barcoding 279–284
  Basque-Navarrese native horse breeds 670–678
  canine 452–454, 735–738, 745–754, 786–802, 817–820, 829–835, 843–846
  Cavalier King Charles Spaniel 745–749
  chicken 698–703
  Chlorophytum 155–160
  Dalmation dog 750–754
  fecal analysis of sympatric carnivores 688–697
  fingerprinting 161–166
  giant squid 417–423
  golden retriever 786–796
  mink 302–309
  mollusk 40–51
  New Zealand triplefin fish 356–362
  penguin 566–571
  Polish Owczarek Nizinny dog 735–738
  ribosomal 4–14, 52–58, 155–160
  safflower 424–429
  sequencing 424–429, 603–606
  sex reversal 452–454, 797–802
  whole genome amplification 829–835
  See also Chloroplast DNA; Genetic linkage mapping; Microsatellites; Mitochondrial DNA; Random amplification of polymorphic DNA
Dogs
  aggressive behavior 786–796
  articular cartilage and osteoarthritis 821–828
  copper toxicosis 803–811
  fibrosarcomas 766–773
  hip dysplasia 847–853
  HMGA1 gene 777–781
  hyperuricosuria 750–754
  major histocompatibility complex 836–842
  melanophilin gene 777–781
  microsatellites 759–763, 843–846
  multiple system degeneration 727–734
  neuronal ceroid lipofuscinosis 735–738
  olfactory receptor genes 812–816
  prostate carcinoma 782–785
  serotonin genes 786–796
  sex reversal 452–454, 759–763, 797–802
  See also under Canine; Inherited dog diseases; *specific breeds*
Domestic cat
  coat color 289–301
  fecal DNA analysis of 688–697
  mutant allele frequencies 557–565
d1 gene. *See dwarf1* gene
DQB locus 310–317
Drosophila, geographic differentation in 502–512
Drosophila melanogaster
  coadaptation of amylase system 388–395
  evolution of age-specific genes 513–521
  genetic linkage mapping 502–512
  random amplification of polymorphic DNA 576–581
Durum wheat, species cytoplasm specific gene from 404–409
dwarf1 gene 614–617

E

Ectodermal dysplasia 727–734
Encystment, in brine shrimp 713–717
En/Spm controlling element, in maize 582–585
Epistasis 586–592
Euarchontoglires genome 485–493

Eucalyptus grandis, fingerprinting and parentage analysis in 161–166
Eucalyptus leucoxylon, microsatellites markers for 445–451
Eurasian otter, mitochondrial DNA in 318–328
European Atlantic sturgeon, Sox9 gene in 150–154
European dogrose, evolutionary genetics of 4–14
European mink, and polecat natural hybridization 89–96
Evolution
  adaptive 169–170, 185–196
  of angiosperms 225–240
  of brain 179–180
  by reticulation 4–14
  of eye 171–184
  of hormone function 205–211
  New Zealand triplefin fish 356–362
  phytochrome 197–204
  of rabies 253–260
Evolutionary genetics
  of animal design 725
  European dogrose 4–14
  Poeciliopis 32–39
Expeditor computer program 80–82
Expressed sequence tags 817–820
Eye degeneration, in Mexican blind cavefish 185–196
Eye development, photoreceptors and 171–184

F

Fecal DNA analysis, of sympatric carnivores 688–697
Felis bengalensis. *See* Leopard cat
Felis catus. *See* Feral cat
Feral cat, fecal DNA analysis of 688–697
Fibrosarcomas, in dogs 766–773
Fingerprinting, in *Eucalyptus grandis* 161–166
FISH. *See* Fluorescent in situ hybridization
Floral isolation, in Mediterranean orchid 15–23
Flower color 550–556
Fluorescent in situ hybridization (FISH)
  Chlorophytum 155–160
  mink 302–309
  safflower 424–429
  scallop 52–58
FOG2 gene 759–763
FOXL2 gene 759–763
FoxP2 gene 212–216

G

Gametophytic self-incompatibility (GSI), in autotetraploids 430–433
GATA4 gene 759–763
GeneChip 821–828
Genetic analysis. *See* Genetic linkage mapping
Genetic linkage mapping
  Atlantic salmon 261–278
  baiji 310–317
  Chinese Crested dog 727–734
  Coffea 59–65
  cotton 132–144
  Drosophila melanogaster 502–512
  durum wheat 404–409
  giant squid 417–423
  mouse 329–338
  pink salmon 24–31
  rat 339–345
  Rps8 gene 536–541
  semidwarfism in barley 654–662
  Xenopus laevis 603–606
  See also Chromosomes; Random amplification of polymorphic DNA
Genetics
  Amaranthus 410–416
  animal design 725
  Basque-Navarrese native horse breed 670–678
  book review on 725
  Chinese river dolphin 310–317
  clonal organism 434–440
  copepod 114–123
  diversity conservation 704–712
  domestic cat 557–565
  Drosophila melanogaster 388–395
  Eucalyptus leucoxylon 445–451
  Helianthus deserticola 241–252
  homoploid hybrid speciation 241–252
  inherited dog disease 475–484
  Kintamani dog 854–859
  morel 396–403
  oak regeneration 627–634
  salt marsh beetle 381–387
  sheep 494–501
  soybean 593–599
  yellow monkey flower 368–375
  See also Evolutionary genetics; Genetic linkage mapping; Population genetics
Genomes
  canine 829–835
  heterozygosity in 85–88
  imprinting 329–338
  mammalian 217–224, 485–493
  mink 302–309
  molluscan 40–51
  mouse 329–338
  New Zealand triplefin fish 356–362
Genotypes
  multilocus 434–440
  Savannah elephant 679–687
GENSTAT computer program 78–79
Giant anteater, microsatellites markers for 600–602
Giant squid, prey in gut contents from 417–423
Gibberellins, in maize 614–617
GLOBOSA gene 225–240
GLP. *See* Glucagon-like peptide
Glucagon-like peptide (GLP) 205–211
Glycine max (L.) Merr. *See* Soybean
Golden retrievers, DNA of 786–796

Gossypium hirsutum L. *See* Cotton
GSI. *See* Gametophytic self-incompatibility

H

Hair, in rat 339–345
Hedgehog signaling 185–196
Helianthus deserticola, genetics of 241–252
Heritabilities, in yellow monkey flower 368–375
Heterosis, in maize 614–617
Heterozygosity, genome-wide 85–88
Hinnites distortus. *See* Scallop
Hip dysplasia, canine 847–853
HMGA1 gene 777–781
Homoploid hybrid speciation, genetics of 241–252
Honeybee, paternal effects on defensive behavior of 376–380
Hordeum vulgare L. *See* Barley
Hormone function, evolution of 205–211
House fly, geographic differentiation in 502–512
HRAS gene 764–765
htr1A/2A genes. *See* Serotonin receptor 1A/2A genes
Hybrid speciation 241–252
Hylocereus polyrhizus, and *Selenicereus* cytogenetics 124–131
Hyperuricosuria, in dogs 750–754
Hypoplasia/syringomyelia 745–749

I

Iberian horses, mitochondrial DNA of 663–669
Imprinting, genomic 329–338
Inherited dog diseases
  genetics 475–484
  occipital hypoplasia/syringomyelia 745–749
  renal 739–744
Italy, Eurasian otters in 318–328

J

Japanese marten, fecal DNA analysis of 688–697

K

Kerry Blue Terriers, canine multiple system degeneration in 727–734
Kintamani dog, genetics of 854–859
Knobbed whelk, sex-linked markers in 108–113
KRAS2 gene 764–765

L

Labrador retrievers
  fibrosarcomas 766–773
  microsatellites 847–853
Laurasiatheria genome 485–493
Leaf defoliation, cotton 644–653
Leishmaniasis, in dogs 755–758
Leopard cat, fecal DNA analysis of 688–697
LHX1 gene 759–763
Lhx9 gene 452–454
Linkage analysis/mapping. *See* Genetic linkage mapping
Lipofuscinosis, neuronal ceroid 735–738
Lipotes vexillifer. *See* Baiji
Littorina saxatilis. *See* Marine snail
Loxodonta africana. *See* Savannah elephant
Lutra lutra. *See* Eurasian otter

M

Maartes melampus. *See* Japanese marten
Maize
  gibberellins in 614–617
  Spotted-dilute controlling element system in 582–585
Major histocompatibility complex (MHC)
  baiji 310–317
  dog 836–842
Mammalian genome 217–224, 485–493
Mammalian metabolism 205–211
Mammary glands, in rat 339–345
Manihot esculenta Crantz. *See* Cassava
Marine snail, population genetics in 460–464
Martes melampus. *See* Japanese marten
Maternal effects, on encystment in brine shrimp 713–717
Mating patterns, Andean oak 635–643
MC1R gene 607–613
Mediterranean orchid, reproductive versus floral isolation in 15–23
Melanism
  moths in Yorkshire 522–528
  mustelid 607–613
Melanophilin gene (*MLPH*) 774–776
Mendelian analysis, Savannah elephant 679–687
Mentha hybrids, markers to identify 542–549
Messenger RNAs (mRNAs), for microarray chip 817–820
Metabolism, in mammals 205–211
Metazoa, photoreceptor cells in 180–183
Mexican blind cavefish, eye degeneration in 185–196
MHC. *See* Major histocompatibility complex
Mice
  quantitative trait loci in 329–338
  tawny coat color in MSKR 145–149
Microarray chip, messenger RNAs for 817–820
Microsatellites
  Adélie penguin 566–571
  Andean oak 635–643
  Basque-Navarrese native horse 670–678
  canine 739–744, 750–754, 759–763, 843–853
  Drosophila 502–512
  for estimating heterozygosity 85–88
  Eucalyptus grandis 161–166
  Eucalyptus leucoxylon 445–451
  giant anteater 600–602
  rainbow trout 97–107
  savannah elephant 679–687
  swordtail 346–355
  X-linked 108–113
  See also Simple sequence repeat
Mimulus guttatus. *See* Yellow monkey flower

Mink
and polecat natural hybridization 89–96
tyrosinemia type II in 302–309
Mitochondrial DNA (mtDNA)
Drosophila 502–512
Eurasian otter 318–328
Iberian horse 663–669
Poeciliopsis 32–39
sheep 494–501
MLGs. *See* Multilocus genotypes
MLPH gene. *See* Melanophilin gene
Moa species, DNA barcoding of 279–284
Molecular applications
coancestry information 718–721
rabies 253–260
whole genome amplification of DNA 829–835
MolKin computer program 718–721
Molluscan genomes 40–51
Morchella esculenta. *See* Morel
Morel, genetic variation in 396–403
mRNAs. *See* Messenger RNAs
MSKR mouse, tawny coat color of 145–149
mtDNA. *See* Mitochondrial DNA
Multilocus genotypes (MLGs) 434–440
Multiple paternity, in swordtail 346–355
Multiple system degeneration, canine 727–734
MURR1 gene 803–811
Mus musculus molossinus. *See* Mice
Mustela sibirica. *See* Siberian weasel
Mustelid melanism 607–613
Mutation
in Adélie penguin 566–571
in Arkansas and Tennessee cat populations 557–565
in *Drosophila melanogaster* 576–581
sparse and wavy hair in rat 339–345
tawny coat color in mouse 145–149
Myrmecophaga tridactyla. *See* Giant anteater

N

NCL. *See* Neuronal ceroid lipofuscinosis
Neoplasias, in dogs 764–765
Neuronal ceroid lipofuscinosis (NCL) 735–738
New Zealand triplefin fishes, genome size evolution in 356–362
Nigella degenii pollen color 550–556
Nobel Prize 626
Norwegian elkhound, familial renal disease in 739–744
Nramp1 gene. *See Slc11a1* gene
NRAS gene 764–765

O

Oak regeneration 627–634
Occipital hypoplasia/syringomyelia 745–749
Odontoptera bidentata moth, melanism in 522–528
Olfactory receptors, in dogs 812–816
OmyFGT19TUF marker 97–107
Oncorhynchus gorbuscha. *See* Pink salmon
Oncorhynchus mykiss. *See* Rainbow trout
Orchid, chloroplast DNA in 66–70
Osteoarthritis, in dogs 821–828

P

Parasitic plants 202
Parentage analysis
in *Eucalyptus grandis* 161–166
in knobbed whelk 108–113
PARK2 gene 727–734
PCR. *See* Polymerase chain reaction
Peditree computer program 465–468
Peppered moth, melanism in 522–528
Periwinkle, self-pollination in 71–77
Photoreceptors
and eye development 171–184
in plants 197–204
Phylogenetic trees 469–470
Phytochrome, in *Arabidopsis thaliana* 197–204
Phytophthora resistance gene 536–541
Pink salmon, genetic linkage mapping in 24–31
Pinscher, coat color dilution in 774–776
PISRT1 gene 759–763
Plants, phytochrome evolution in 197–204
Poeciliopsis, evolution of triploid 32–39
Pogonus littoralis. *See* Salt marsh beetle
Polecat, and European mink natural hybridization 89–96
Polish Owczarek Nizinny dog 735–738
Pollen color 550–556
Polymerase chain reaction (PCR)
Coffea 59–65
dog 766–773
giant squid 417–423
morel 396–403
sheep 494–501
single-seed 66–70
sympatric carnivore 688–697
Polymononucleotides, in molluscan genomes 40–51
Population genetics
Cryptocercus wood-feeding cockroaches 572–575
marine snail 460–464
morel 396–403
salt marsh beetle 381–387
PPT1 gene 735–738
PRECISE computer program 618–622
Primed in situ labeling (PRINS) 603–606
PRINS. *See* Primed in situ labeling
Proglucagon-derived peptides 205–211
Prostate carcinoma, canine 782–785
Pygoscelis adeliae. *See* Adélie penguin

Q

QTL. *See* Quantitative trait loci
Quantitative trait loci (QTL)
cotton 132–144, 441–444, 644–653

Labrador Retriever/Greyhound crossbreeds 847–853
mouse 329–338
rainbow trout 97–107
selection bias in 363–367
sex-linked 97–107
Quercus humboldtii. *See* Andean oak

R

Rabies, North American 253–260
Raccoons, rabies from 253–260
Rainbow trout, quantitative trait loci 97–107
Random amplification of polymorphic DNA (RAPD)
clonal organisms 434–440
Drosophila melanogaster 576–581
Mentha hybrids 542–549
morel 396–403
RAPD. *See* Random amplification of polymorphic DNA
RAS genes 764–765
Rat chromosome 17, sparse and wavy hair in 339–345
rDNA. *See* Ribosomal DNA
Rearing environment, in Atlantic salmon 261–278
"Reduced height genes" (Rht), in wheat 455–459
Reference strand-mediated conformation analysis (RSCA), for DLA-DRB1 in dogs 836–842
Renal disease 739–744
Reproductive tactic, in Atlantic salmon 261–278
Restriction fragment length polymorphism (RFLP)
cotton 132–144
sheep 494–501
Retinal diseases 476
Reverse painting, in canine fibrosarcomas 766–773
RFLP. *See* Restriction fragment length polymorphism
Rht genes. *See* "Reduced height genes"
Ribosomal DNA
Chlorophytum 155–160
of European dogroses 4–14
Hinnites distortus 52–58
Richner-Hanhart syndrome. *See* Tyrosinemia type II
Rosa genus, multiple hybridization across 4–14
Rps8 gene. *See Phytophthora* resistance gene
RSCA. *See* Reference strand-mediated conformation analysis

S

Safflower, DNA sequences in 424–429
Salt marsh beetle, population genetics in 381–387
Savannah elephant, microsatellites in 679–687
Scallop, chromosomes of 52–58
Selection bias, in quantitative trait loci mapping 363–367
Selenicereus megalanthus, and *Hylocereus* cytogenetics 124–131
Self-pollination, in periwinkle 71–77
Semidwarfism, in barley 654–662
Serapias L. *See* Mediterranean orchid
Serotonin receptor 1A/2A genes, in dogs 786–796
Serotonin transporter gene, in dogs 786–796
Sex determination, sympatric carnivore 688–697
Sex-linked markers
in knobbed whelk 108–113
in rainbow trout 97–107
Sex reversal, in dogs 452–454, 759–763, 797–802
SF1 gene 759–763
Sheep, genetic diversity in 494–501
Siberian weasel, fecal DNA analysis of 688–697
Simple sequence repeat (SSR)
cotton leaf defoliation 644–653
soybean 536–541
See also Microsatellites
Single nucleotide polymorphisms (SNPs)
chicken 698–703
soybean 529–535
Single-stranded RNA virus, rabies from 253–260
slc6A4 gene. *See* Serotonin transporter gene
Slc11a1 gene 755–758
SNPs. *See* Single nucleotide polymorphisms
Song-learning birds, *FoxP2* gene in 212–216
SOX9 gene
in European Atlantic sturgeon 150–154
in sex reversal dogs 759–763, 797–802
Soybean
genetic divergence 593–599
simple sequence repeat 536–541
single nucleotide polymorphisms 529–535
Spatial structure, of rabies 253–260
Speciation
book review on 470–471
homoploid hybrid 241–252
Species cytoplasm specific gene 404–409
Spf. *See Spotting factor*
Spotted-dilute controlling element system, in maize 582–585
Spotting factor, in maize 582–585
Sry gene
in dogs 452–454, 759–763, 797–802
in sympatric carnivores 688–697
SSR. *See* Simple sequence repeat
Swordtail, multiple paternity in 346–355
Sympatric carnivores, fecal DNA analysis of 688–697
Syringomyelia 745–749

T

TAG-8-141 haplotype 755–758
TAG-9-145 haplotype 755–758
TGFBR1 gene 766–773
Thermotolerance, in rainbow trout 97–107
Tibetan terrier 735–738
Tigriopus californicus. *See* Copepod
TPP1 gene 735–738
Translocation chromosomes, canine 766–773
Triticum turgidum L. *See* Durum wheat
Tsushima Islands (Japan), fecal DNA analysis of sympatric carnivores on 688–697
TYR gene. *See Tyrosinase* gene
Tyrosinase gene 289–301
Tyrosinase related protein 1 gene 289–301

Tyrosine aminotransferase cDNA 302–309
Tyrosinemia type II, in mink 302–309
TYRP1 gene. *See Tyrosinase related protein 1* gene

U

Upper thermal tolerance (UTT), in rainbow trout 97–107
Urate oxidase (uox) gene 750–754
UTT. *See* Upper thermal tolerance

V

Vine cacti, cytogenetics of intergeneric 124–131
Vocal-learning mammals, *FoxP2* gene in 212–216

W

Weedy *Amaranthus* 410–416
Weitzman approach, to genetic diversity conservation 704–712
WGA. *See* Whole genome amplification
Wheat
  durum 404–409
  "reduced height genes" in 455–459
Whole genome amplification (WGA), of DNA 829–835
Wood-feeding cockroaches, population genetics of 572–575
WT1 gene 759–763
WTC rats, chromosome 17 in 339–345

X

Xenarthra genome 485–493
Xenopus laevis genetic linkage mapping 603–606
Xiphophorus multilineatus. See Swordtail
X-linked microsatellite marker 108–113
XX sex reversal, in dogs 452–454, 759–763, 797–802

Y

Yellow monkey flower, heritabilities and genetic correlation in 368–375
Yorkshire (England), melanic moths in 522–528

Z

Zea mays L. *See* Maize

Title Index

A

Adaptive Evolution of Eye Degeneration in the Mexican Blind Cavefish 185–196

Age-Specific Changes in Epistatic Effects on Mortality Rate in *Drosophila melanogaster* 513–521

Alleles in Space (AIS): Computer Software for the Joint Analysis of Interindividual Spatial and Genetic Information 722–724

Allelic Differences at Two Loci Govern Different Mechanisms of Intraflower Self-Pollination in Self-Pollinating Strains of Periwinkle 71–77

Amplified Fragment Length Polymorphism-Based Genetic Relationships Among Weedy *Amaranthus* Species 410–416

Analysis of Allele Fidelity, Polymorphic Information Content, and Density of Microsatellites in a Genome-Wide Screening for Hip Dysplasia in a Crossbreed Pedigree 847–853

Assessing Genetic Diversity in Clonal Organisms: Low Diversity or Low Resolution? Combining Power and Cost Efficiency in Selecting Markers 434–440

Atlas: A Java-Based Tool for Managing Genotypes 623–625

B

Base Composition of *Coffea* AFLP Sequences and Their Conservation Within the Genus 59–65

The Bell Family Legacies 1–3

"Best Friends" Sharing the *HMGA1* Gene: Comparison of the Human and Canine HMGA1 to Orthologous Other Species 777–781

C

Canine DNA Subjected to Whole Genome Amplification is Suitable for a Wide Range of Molecular Applications 829–835

Characterization and Molecular Mapping of Genes Determining Semidwarfism in Barley 654–662

Characterization of Candidate Genes for Neuronal Ceroid Lipofuscinosis in Dog 735–738

Characterization of Sox9 in European Atlantic Sturgeon (*Acipenser sturio*) 150–154

Chloroplast DNA Inheritance in the Orchid *Anacamptis palustris* Using Single-Seed Polymerase Chain Reaction 66–70

Chromosomal Assignment of RFLP Linkage Groups Harboring Important QTLs on an Intraspecific Cotton (*Gossypium hirsutum* L.) Joinmap 132–144

Chromosomal Assignment of the Canine Melanophilin Gene (*MLPH*): A Candidate Gene for Coat Color Dilution in Pinschers 774–776

Chromosome Analysis and Mapping of Ribosomal Genes by One- and Two-Color Fluorescent in situ Hybridization in *Hinnites distortus* (Bivalvia: Pectinidae) 52–58

Chromosome Rearrangements in Canine Fibrosarcomas 766–773

Combining Inter- and Intrapopulation Information with the Weitzman Approach to Diversity Conservation 704–712

Comparison of the Tyrosine Aminotransferase cDNA and Genomic DNA Sequences of Normal Mink and Mink Affected with Tyrosinemia Type II 302–309

Cytogenetics of Semi-Fertile Triploid and Aneuploid Intergeneric Vine Cacti Hybrids 124–131

D

The Development of a High-Density Canine Microarray 817–820

Discovery of SNPs in Soybean Genotypes Frequently Used as the Parents of Mapping Populations in the United States and Korea 529–535

Distribution Properties of Polymononucleotide Repeats in Molluscan Genomes 40–51

E

The Ecological Genetics of Homoploid Hybrid Speciation 241–252

Epistasis in the Expression of Relevant Traits in Cassava (*Manihot esculenta* Crantz) for Subhumid Conditions 586–592

Establishment of a Cell Line Derived from a Canine Prostate Carcinoma with a Highly Rearranged Karyotype 782–785

Estimating Heritabilities and Genetic Correlations with Marker-Based Methods: An Experimental Test in *Mimulus guttatus* 368–375

European Mink-Polecat Hybridization Events: Hazards From Natural Process? 89–96

Evaluation of Candidate Genes in the Absence of Positional Information: A Poor Bet on a Blind Dog! 475–484

Evaluation of Canine *COL4A3* and *COL4A4* as Candidates for Familial Renal Disease in the Norwegian Elkhound 739–744

Evolution by Reticulation: European Dogroses Originated by Multiple Hybridization Across the Genus *Rosa* 4–14

Evolution of New Hormone Function: Loss and Gain of a Receptor 205–211

Exclusion of Candidate Genes for Canine *SRY*-Negative XX Sex Reversal 759–763

Exclusion of *Lhx9* as a Candidate Gene for *Sry*-Negative XX Sex Reversal in the American Cocker Spaniel Model 452–454

Exclusion of Urate Oxidase as a Candidate Gene for Hyperuricosuria in the Dalmatian Dog Using an Interbreed Backcross 750–754
Expeditor: A Pipeline for Designing Primers Using Human Gene Structure and Livestock Animal EST Information 80–82

F

Fecal DNA Analysis for Identifying Species and Sex of Sympatric Carnivores: A Noninvasive Method for Conservation on the Tsushima Islands, Japan 688–697
Fifty-Four New Gene-Based Canine Microsatellite Markers 843–846
A First Assessment of Genetic Variation Among *Morchella esculenta* (Morel) Populations 396–403
FoxP2 in Song-Learning Birds and Vocal-Learning Mammals 212–216
From DNA to Diversity, Molecular Genetics and the Evolution of Animal Design (book review) 725

G

Genes in Canine Articular Cartilage That Respond to Mechanical Injury: Gene Expression Studies With Affymetrix Canine GeneChip 821–828
Genetic Analysis of the Species Cytoplasm Specific Gene (scs^{d}) Derived from Durum Wheat 404–409
The Genetic Basis of Naturally Occurring Pollen Color Dimorphisms in *Nigella degenii* (Ranunculaceae) 550–556
Genetic Basis of Variation in Morphological and Life-History Traits of a Wild Population of Pink Salmon 24–31
Genetic Coadaptation of the Amylase Gene System in *Drosophila melanogaster*: Evidence for the Selective Advantage of the Lowest AMY Activity and of Its Epistatic Genetic Background 388–395
Genetic Consequences of Many Generations of Hybridization Between Divergent Copepod Populations 114–123
Genetic Differentiation Among Populations of the Salt Marsh Beetle *Pogonus littoralis* (Coleoptera: Carabidae): A Comparison Between Atlantic and Mediterranean Populations 381–387
Genetic Differentiation and Estimation of Effective Population Size and Migration Rates in Two Sympatric Ecotypes of the Marine Snail *Littorina saxatilis* 460–464
Genetic Divergence between North American Ancestral Soybean Lines and Introductions with Resistance to Soybean Cyst Nematode Revealed by Chloroplast Haplotype 593–599
Genetic Diversity Within and Among Four South European Native Horse Breeds Based on Microsatellite DNA Analysis: Implications for Conservation 670–678
Genetic Mapping of Canine Multiple System Degeneration and Ectodermal Dysplasia Loci 727–734
Genetic Screening for Prey in the Gut Contents from a Giant Squid (*Architeuthis* sp.) 417–423
Genetic Structure Inside a Declining Red Oak Community in Old-Growth Forest 627–634
A Genetic Test of Bioactive Gibberellins as Regulators of Heterosis in Maize 614–617
Genome Size Evolution in New Zealand Triplefin Fishes 356–362
Genome Sizes in Afrotheria, Xenarthra, Euarchontoglires, and Laurasiatheria 485–493
GENSTAT Programs for Performing Muir's Alternative Partitioning of Genotype-by-Environment Interaction 78–79
Geographic Differentiation in the House Fly Estimated by Microsatellite and Mitochondrial Variation 502–512

H

High Diversity of the Chicken Growth Hormone Gene and Effects on Growth and Carcass Traits 698–703
High-Resolution Characterization of the Canine DLA-DRB1 Locus Using Reference Strand-Mediated Conformational Analysis 836–842
How to Win the Nobel Prize: An Unexpected Life in Science (book review) 626

I

Identification of Microsatellite DNA Markers for the Giant Anteater *Myrmecophaga tridactyla* 600–602
Independent Nonframeshift Deletions in the *MC1R* Gene Are Not Associated with Melanistic Coat Coloration in Three Mustelid Lineages 607–613
Independent Origins of Allotriploidy in the Fish Genus *Poeciliopsis* 32–39
Inferences on the Role of Insertion in a Mutation Accumulation Experiment with *Drosophila melanogaster* Using RAPDs 576–581
Inherited Occipital Hypoplasia/Syringomyelia in the Cavalier King Charles Spaniel: Experiences in Setting Up a Worldwide DNA Collection 745–749
In Situ Chromosomal Localization of rDNA Sites in "Safed Musli" *Chlorophytum* Ker-Gawl and Their Physical Measurement by Fiber FISH 155–160
Interaction of Rearing Environment and Reproductive Tactic on Gene Expression Profiles in Atlantic Salmon 261–278
Is a Large-Scale DNA-Based Inventory of Ancient Life Possible? 279–284

K

The Kintamani Dog: Genetic Profile of an Emerging Breed from Bali, Indonesia 854–859

L

Lack of the *SOX9* Gene Polymorphism in Sex Reversal Dogs (78,XX; *SRY* negative) 797–802
Localization of Repetitive DNA Sequences on in vitro *Xenopus laevis* Chromosomes by Primed in situ Labeling (PRINS) 603–606

M

The Many Faces of the Copper Metabolism Protein MURRI/COMMDI 803–811
Mapping and Exclusion Mapping of Genomic Imprinting Effects in Mouse F2 Families 329–338
Mapping Quantitative Trait Loci Associated with Leaf and Stem Pubescence in Cotton 441–444
Maternal Effects on Encystment in Crosses Between Two Geographic Strains of *Artemia franciscana* 713–717
Mating Patterns of a Subdivided Population of the Andean Oak (*Quercus humboldtii* Bonpl., Fagaceae) 635–643
Melanic Moth Frequencies in Yorkshire, an Old English Industrial Hot Spot 522–528
Mitochondrial Sequence Reveals High Levels of Gene Flow Between Breeds of Domestic Sheep from Asia and Europe 494–501
Molecules, Biodiversity, and Adaptive Evolution 169–170
MolKin v2.0: A Computer Program for Genetic Analysis of Populations Using Molecular Coancestry Information 718–721
Multiplexed Microsatellite Markers for the Genetic Analysis of *Eucalyptus leucoxylon* (Myrtaceae) and Their Utility for Ecological and Breeding Studies in other *Eucalyptus* Species 445–451
Mutant Allele Frequencies in Domestic Cat Populations in Arkansas and Tennessee 557–565
Mutational Bias in Penguin Microsatellite DNA 566–571

N

The Neurobiology of Autism (book review) 471–472
New Perspectives on Eye Development and the Evolution of Eyes and Photoreceptors 171–184
Noninvasive Genotyping and Mendelian Analysis of Microsatellites in African Savannah Elephants 679–687
Novel Repeated DNA Sequences in Safflower (*Carthamus tinctorius* L.) (Asteraceae): Cloning, Sequencing, and Physical Mapping by Fluorescence in situ Hybridization 424–429
A Nucleotide Substitution Responsible for the Tawny Coat Color Mutation Carried by the MSKR Inbred Strain of Mice 145–149

O

Obituary: Hampton L. Carson 285–286
Olfactory Receptor Sequence Polymorphism Within and Between Breeds of Dogs 812–816
On the Estimation of Genome-wide Heterozygosity Using Molecular Markers 85–88
The Origins of Iberian Horses Assessed via Mitochondrial DNA 663–669

P

Paternal Effects on the Defensive Behavior of Honeybees 376–380
Peditree: Pedigree Database Analysis and Visualization for Breeding and Science 465–468
Phylogenetic Trees Made Easy (book review) 469–470
Phytochrome Evolution in Green and Nongreen Plants 197–204
Polymorphism of *Slc1 1a1* (*Nramp1*) Gene and Canine Leishmaniasis in a Case-Control Study 755–758
Population Genetics of Wood-Feeding Cockroaches in the Genus *Cryptocercus* 572–575
Power of Microsatellite Markers for Fingerprinting and Parentage Analysis in *Eucalyptus grandis* Breeding Populations 161–166
PRECISE: Software for Prediction of cis-Acting Regulatory Elements 618–622

R

RAS Gene Hot-Spot Mutations in Canine Neoplasias 764–765
Reproductive Versus Floral Isolation Among Morphologically Similar *Serapias* L. Species (Orchidaceae) 15–23
Retention of Latent Centromeres in the Mammalian Genome 217–224
Right Hand, Left Hand: The Origins of Asymmetry in Brains, Bodies, Atoms and Cultures (book review) 471

S

Selection Bias in Quantitative Trait Loci Mapping 363–367
Sequence Variation and Gene Duplication at MHC *DQB* Loci of Baiji (*Lipotes vexillifer*), a Chinese River Dolphin 310–317
Sex-linked Markers Facilitate Genetic Parentage Analyses in Knobbed Whelk Broods 108–113
Sex-linked Quantitative Trait Loci for Thermotolerance and Length in the Rainbow Trout 97–107
Simple Sequence Repeat Marker Associated with a Natural Leaf Defoliation Trait in Tetraploid Cotton 644–653
Single-Locus Gametophytic Incompatibility in Autotetraploids 430–433
Soybean *Phytophthora* Resistance Gene *Rps8* Maps Closely to the *Rps3* Region 536–541
Sparse and Wavy Hair: A New Model for Hypoplasia of Hair Follicle and Mammary Glands on Rat Chromosome 17 339–345
Spatial Dynamics and Molecular Ecology of North American Rabies 253–260
Speciation (book review) 470–471
Spotting factor (Spf) from the *Spotted-dilute* System in Maize Is a Member of the *En/Spm* Controlling Element Family 582–585
Strong Reproductive Skew Among Males in the Multiply Mated Swordtail *Xiphophorus multilineatus* (Teleostei) 346–355
Structure and Variation of Three Canine Genes Involved in Serotonin Binding and Transport: The Serotonin Receptor 1A Gene (*htr1A*), Serotonin Receptor 2A Gene (*htr2A*), and Serotonin Transporter Gene (*slc6A4*) 786–796

Structure of the Mitochondrial Control Region of the Eurasian Otter (*Lutra lutra*; Carnivora, Mustelidae): Patterns of Genetic Heterogeneity and Implications for Conservation of the Species in Italy 318–328

T

To B or Not to B a Flower: The Role of *DEFICIENS* and *GLOBOSA* Orthologs in the Evolution of the Angiosperms 225–240

The Transfer and History of "Reduced Height Genes" (Rht) in Wheat from Japan to Europe 455–459

Tyrosinase and *Tyrosinase Related Protein 1* Alleles Specify Domestic Cat Coat Color Phenotypes of the *albino* and *brown* Loci 289–301

U

Use of RAPD and AFLP Markers to Identify Inter- and Intraspecific Hybrids of *Mentha* 542–549
